Notes:

Location

Replacing the UltraBay II Device

You want to...	You need to...
swap the device in the UltraBay II	release the bay eject levers; then a message appears. Make sure the LED stays on green and there is no beep; then swap the device.
attach the diskette drive externally	power off your computer; then attach the external diskette drive.
Note: Some devices or configuration might not support Hot plug. If the LED is blinking orange, you cannot operate.	

Function Keys

Fn+	Result
F2	Displays the battery power status indicator or erases it when it is being displayed. (The Fuel program must first be activated.)
F3	Places the computer in standby mode.
F4	Places the computer in suspend mode.
F7	Changes computer display output locations.
F8	Changes computer LCD modes.
F11	Changes the power modes during battery-power operation
F12	Places the computer in hibernation mode.

Getting Service

Always read the **Troubleshooting** chapter of your **User's Guide** or **Online Book** before calling IBM.

During the warranty period, you can get help and information from the IBM PC Support Line in your country. Before you call, fill out the front of this card. Also have:

- The exact wording of any error messages
- Hardware and software configuration information
- A description of the problem
- Information and serial numbers of any options installed on your system

International Warranty Service

Before you travel outside of the country where you purchased your ThinkPad, you should register for international warranty service. Using the online product registration does not automatically register you for international service.

See the *International Service Information* booklet shipping with your computer.

Battery Status

You can see the battery status by **Fuel** program. To start the **Fuel** program, click on **Start**, select **Programs** and **ThinkPad**, and click on **Fuel**.

ThinkPad Configuration Program

You can customize your hardware system settings with the ThinkPad Configuration program. To start the ThinkPad Configuration program, click on **Start** select **Programs** and **ThinkPad**, and double-click on **ThinkPad Configuration**.

Power Management: To manage your battery power efficiently, you can set the power-saving mode with the ThinkPad Configuration program. Click on the **Power Management** button () and then click on the **Power Management** tab.

TrackPoint Setting: You can customize such TrackPoint functions as **Press-to-Select**, **Sensitivity**, and **Scrolling**.

Click on the **TrackPoint** button ().

Help: For more information, click on the **Help** button ().
