

# PARADISE IS FULL OF TEMPTATIONS.

© 1989 Paradise Systems, Inc.

**P** Rich colors and dazzling graphics await you with 100% VGA compatible graphics cards from Paradise.™

Choose the VGA Plus.™ For 16 vivid colors in 800 x 600 resolution, along with 132-column text.

For higher performance, choose the VGA Plus 16.™ Its 16-bit data bus and 16-bit video BIOS with AutoSense™ rushes information to your screen, giving you 256 colors in 640 x 400 resolution under Microsoft® Windows. Or support 800 x 600 graphics with 16 colors and 132-column text.

For highest professional quality results, pick the VGA Professional.™ It offers you 512 KB of video memory. Whether you're running 640 x 480 graphics with 256 colors under Windows. Or dazzling 16-color, 800 x 600 graphics with 132-column text.

For an exceptional value, choose the Basic VGA.™ It offers full compatibility with VGA and all pre-VGA modes plus speedy performance at a surprising price.

All Paradise cards work in the IBM PC/XT/AT® and PS/2® Models 25 and 30 and compatibles. They're compatible with VGA, EGA, CGA, MDA and Hercules® — a fact we support with our exclusive three-year compatibility guarantee and warranty. Plus the most comprehensive service and support in the industry.

So succumb to temptation. Call us at 800-356-5787 for more information about the best-selling graphics cards in the world.
