NEC V-20 MICROPROCESSOR - \$ 19  
 improved replacement for the PCjr's 8088 that speeds  
 up the computer in many applications and consumes less  
 power. We recommend this for all jrHOTOSHOT upgrades.  
 Most 8088's are in a socket but some are soldered in  
 place and will require removal by a qualified technician.  
 Check your computer before ordering. Each V-20 chip  
 is provided with a speed test program .  
 We can remove the 8088 from your computer and install  
 a socket for \$ 45 plus shipping.

- - **MEMORY EXPANSION SERVICE** - -

We can expand the memory capacity of 128K sidemounted  
 memory expansion units to 512K for a system total of 640K  
 Upgrades normally take 15 working days or less after  
 we receive your working unit:

IBM or Tecmar jr-Captain expansion upgrade \$ 155  
 Microsoft booster expansion upgrade \$ 175

If you own two of the IBM 128K sidemount expansion units  
 we offer a \$ 50 trade in credit for working units toward  
 the cost of upgrading your second expansion unit.

**CONNECTING CABLE:**

Cable joining the auxilliary control card to the existing internal  
 disk drive and to the new 2nd disk drive. IBM thoughtfully provided  
 a slot for this ribbon cable on the right side of the computer  
 case near the rear.

**ENABLING SOFTWARE:**

Files for the 2nd disk drive are provided for reconfiguring  
 your DOS boot disk to recognize the 2nd disk drive, and to  
 automatically enable the 80 column mode.

**MODEM SLOT DISK DRIVE CONTROL CARD:**

This card plugs into the modem slot inside the computer and connects  
 to the existing disk drive control card by the cable previously used  
 for the internal disk drive. With this system is usable in conjunction  
 with an external modem ty using the IBM adapter cable for serial devices.

**jrHOTOSHOT DISK DRIVE CONTROL CARD:**

This type of auxillary card fits below the disk drive and plugs into  
 the microprocessor or 8088 chip socket. The microprocessor is inturn  
 plugged into this card. The 8088 chip can be replaced with a NEC V-20  
 chip in this card to speed up the PCjr's operation about 20%. With  
 this disk drive system the PCjr internal modem can be used.

**COMPATIBILITY:**

Either of these disk drive expansions are operable with side  
 mounted memory additions such as those manufactured by IBM,  
 AST, TECHMAR, and IMPULSE.
